Dear Karin,

I am enclosing 4 files. The one with "example questions" updates the one I sent two weeks ago. Only one question has changed, one under rock mechanics.

The other files are questions that may or may not be among the "example questions" and that may be possible to address during the site visits. It would help us work more efficiently if a number of specialist issues were addressed tout-court or in greater detail during the site visits. Perhaps SKB could make a more specific proposal on how this can be done? Additionally, SKB will always have the possibility to respond to those questions in writing also after the review meeting, if they wish to do so.

With kind regards

Claudio
