

# **Draft Program for NEA IRT visit to Canister Laboratory December 14<sup>th</sup> 2012**

The aim of the programme is to provide Canister specific information to the IRT team for the review of the post closure safety of the repository.

The presentations will follow the structure in the Canister production line report, TR-10-14.

## **Schedule**

**8.30 -8.45 Arrival welcome and overview of the day Håkan Rydén, Head of Canister Laboratory**

### **8.45-10.45 Lab Tour**

A walk around in the laboratory to follow the path in the canister line and demonstration of the systems used for welding and NDT is planned. The visit at the Canister laboratory can, for obvious reasons not include the supplier network and these processes will be described orally. During the Lab Tour discussions and questions from the IRT team to SKB experts to clarify any IRT questions are most welcome.

*Coffee break*

### **Presentations 11.00-15.45**

The questions put by IRT will answered. As only a Swedish document reference exists for manufacturing technology emphasis in the presentations will be on filling this lack of information.

*Lunch will be provided at the laboratory and a break will take part between 12.00-12.45*

*Coffee break is planned at 14.30*

*Departure to airport 16.00*
